

Application No.: 10/074,814

Reply to Office Action of June 16, 2004

This listing of claims will replace all prior versions and listings of claims in this application:

Listing of Claims

1-18. (Canceled)

19. (Currently amended): A method for treating a non-neutral pH hazardous material spill comprising: An aqueous foam comprising an aqueous foamable concentrate foamed with non-neutral pH aqueous liquid, the aqueous foamable concentrate comprising a foam-forming agent, a foam stabilization polymer, and a non-aqueous solvent

producing a non-neutral pH foam by foaming an aqueous foamable concentrate with non-neutral pH aqueous liquid, the concentrate being tolerant to the non-neutral pH of the aqueous liquid; and
deploying the non-neutral pH foam over a non-neutral pH hazardous material.

20. (Current amended): The aqueous foam method of claim 19, wherein the non-neutral pH liquid has a pH of less than 4.5 and forms an acidic foam.

21. (Current amended): The aqueous foam method of claim 19, wherein the non-neutral pH liquid has a pH of greater than 9.5 and forms a caustic foam.
